OPSIFY

opsifyapp.com

Marine service shops still run on texts and a whiteboard. Opsify puts every job in one place.

Work orders, parts, labor hours and customer updates, from first call to paid invoice.

Built with marine service shops in Annapolis. Opsify is the simple job hub for marine service businesses. Employees log time, parts and photos on a phone app they will actually use. Customers see where their boat stands. Invoices go out through the QuickBooks the shop already runs on, and we move each shop's customers, boats, parts and history over for them.

LABOR	**4.5 hrs · 3 photos** logged by Mike R.
PARTS	**Antifreeze, impeller kit** on the invoice
CUSTOMER	"Wrap on Thursday." **Reviewed and sent**

✓ Invoice synced to QuickBooks

HOW SHOPS USE IT

Nothing slips. Requests, estimates, parts and work orders live in one place, and parts carry through to the invoice.

Every hour counts. Employees log time, parts and photos on a phone app built for boats, so billing matches the work.

Customers in the loop. Customers see status, photos and job history. The shop reviews every update before it goes out.

Works with QuickBooks. Invoices keep going out the way they do now. Setup and migration are done with the shop.

WHY NOW

Several shops in discovery said no software vendor had ever contacted them. Ten had dropped or resented a tool built for plumbers, auto shops or marinas. Many are booked 4 to 8 weeks out, growing, and spending 20 to 80 hours a week on admin.

THE BUSINESS

Monthly subscription per location, $100 to $300 a month by team size, QuickBooks included. Marine is the beachhead. Discovery found the same pain in landscaping, pool service and home repair, and a second vertical follows two marine case studies.

TEAM

John Gonsalves (founder and CEO) grew up around marine service and ran a marine detailing company in Annapolis for 4.5 years. Jesse Washburn (co-founder and CTO) brings years of production software engineering experience and has founded and exited a startup. TEDCO Pava LaPere Innovation Award recipient.

What's next

Growth beyond Maryland in 2027

The plan. A first hire, and taking the Annapolis in-person playbook to marine hubs beyond Maryland. Opsify is exploring angel investment and has not launched a round.

Looking for. Intros to marine shops outside Maryland, and people who have sold software to small service businesses.
